

LOGIMEC

Ultrasonic cleaners.

Mod. 270 HD

The new "HD" branded ultrasonic cleaners mark the new direction Logimec is taking in its production of ultrasonic washers. All the models satisfy the highest quality standards with compact and reliable products, essential for fast, deep cleaning of any article having an irregular surface or with a particularly complex shape.

The new HD line represents the natural next step after its predecessor models, featuring a series of important changes such as the adoption of a powerful microprocessor combined with a sophisticated exclusive Logimec software, which allows our appliances to automatically adapt the best washing frequency to some variable parameters, like the temperature of the washing liquid, its level and the volume of the parts to be washed.

Main features:

- Lid
- Automatic sweep function
- Thermostat to set temperature of the washing liquid from 20° to 70° C
- Washing cycle timer from 1 to 15 min
- Water drain valve

Optional accessories

- HOOKS made of scratch-resistant laminated steel. They are applied on basket edge to support objects and keep them apart.
- BASKETS in stainless steel. Ideal for simultaneous washing of small objects.
- BEAKERS in antiacid polypropylene. Necessary for bain-marie washing with detergents that are not compatible with the steel basket.
- SUPPORTS FOR BEAKERS AND VIALS stainless steel plates with one or more holes, to keep beakers vertical and apart from one another.
